

## PROCEEDINGS OF THE THIRTY-SEVENTH MEETING.

HELD in the Metallurgical Lecture Room, Applied Science Department, The University, St. George's Square, Sheffield, on Wednesday, October 27th, 1920, at 2.45 p.m., Mr. W. BUTLER in the Chair.

The CHAIRMAN, in the name of the Society, gave a welcome to those members of the Society who had recently returned from a visit to America. The meeting was not so large as they would have liked, but it was good that so many were present, considering the adverse industrial conditions under which the country suffered owing to the coal strike. (Dr. Peddle here observed that it was one of the biggest meetings they had held.)

Continuing, the Chairman said that they were there to welcome pilgrims who had gone to see the wonders of America.

The following then spoke on the subject before the meeting, "Lessons from the Visit to America":—Prof. W. E. S. Turner, Messrs. W. J. Rees, G. P. Gass, H. N. Clark, W. B. Mitchell, H. A. Bateson, H. Gregg, W. C. Snowdon, A. L. Foster, R. L. Frink, and the Chairman.
